

**Industrial
adhesives
and silicones**

Our solutions

Anaerobic fastening (including threadlocking and thread sealing)

Anaerobic curing between metal surfaces when oxygen is no longer present. Used for locking, sealing and fixing metal connections. Prevents loosening due to vibration, leakage, play, etc.

Product types:

Threadlockers, pipe sealants, retaining compounds and anaerobic flange sealants.

Applications:

Threadlocking and thread sealing, hydraulic and pneumatic couplings, bearings, bushings, shafts, flanges and metal assemblies.

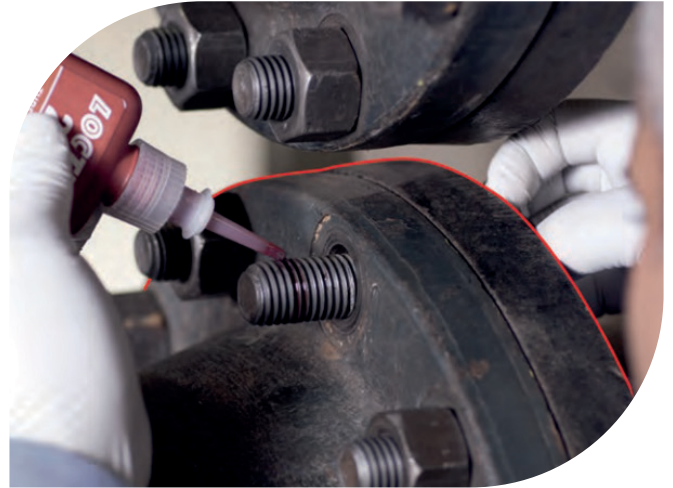

Instant adhesives and contact adhesives (Cyanoacrylates)

For fast bonding of parts with broad material compatibility. They cure quickly through reaction with surface moisture.

Product types:

Cyanoacrylate adhesives, contact adhesives, universal assembly adhesives and assembly cements.

Applications: Bonding of rubber, plastic, metal, leather, wood, ceramic, seals, profiles, strips, upholstery, labels and small technical components.

2-component epoxy adhesives

Consist of a resin and hardener that react chemically when mixed. For strong, structural bonding and repair. Available as liquid, paste-like or metal-filled products for repairing damaged parts.

Product types:

2K epoxy adhesives, epoxy pastes, metal-filled repair pastes and liquid metal repair products.

Applications: Structural bonding and repair of metal, plastic, composite, wood, ceramic, pumps, housings, shafts, tanks, castings and technical components.

Elastic sealants, silicones, RTVs and PU products

For sealing, filling or elastic bonding. Used in applications where movement, vibration, temperature differences, etc. are present. RTV silicones cure at room temperature and form a flexible, rubber-like seal. Hybrid polymers and PU products cure through reaction with moisture. Non-curing products are also available.

Product types:

RTV silicones, gaskets, hybrid polymers, PU sealants and foams, heat-resistant mastics, rubber repair compounds, etc.

Applications: Flange sealing, engine and machine housings, joints and seams, assembly, PU filling, roofing and bodywork applications, etc.

Onze merken

BOSTIK®

Adhesive and sealing solutions for construction, decoration and industrial applications.

ARALDITE®

Araldite®

Known for its epoxy adhesives used in various industrial applications.

LOCTITE®

LOCTITE

Offers an extensive range of adhesives and sealants, including silicone products, for industrial and consumer applications.

Soudal®

Soudal

Offers a wide range of adhesives, sealants and silicones for various applications.

DEVCON®

Devcon

Maintenance and repair solutions for a wide range of sectors.

JELT®

Jelt

Industrial systems, materials and high-quality technical products used in various sectors.

TEC7®

Multifunctional adhesives and sealants for construction and renovation.

HYLOMAR®

HYLOMAR

Offers non-curing sealants, often used in the automotive and aviation industries.

DEN BRAVEN®

Den Braven

High-quality adhesives and sealants for construction and industry.

“

*40 years of expertise in
the industry makes
Ardeca Industries your
reliable partner*

”

With 40 years of expertise in the industry, Ardeca Industries is known as a reliable partner in providing specialized solutions for lubrication, silicone products, industrial adhesives, and degreasers/cleaners.

Our unique market position and independent collaboration with renowned manufacturers enable us to offer custom solutions that are efficient, sustainable, and environmentally friendly, precisely tailored to your specific needs and challenges.
