

*Surface treatment
and painting
products*

Our solutions

Industrial lacquers, paints and coatings

The range includes fast-drying 1K spray paints, industrial paints in cans, acrylic and alkyd systems, primers, stain products and special coatings recommended according to the application, substrate, required gloss level, corrosion protection, industrial load, etc.

Range: Belton, Motip, Racing, Auto K, Vibol

Applications: Used on materials such as metal, concrete and plastic for maintenance, touch-ups, machine construction, bodywork, metal structures, concrete floors, workshops, warehouses and general industrial surface finishing.

Marking, line marking and paint accessories

The range includes marking sprays, tracing paints, fluorescent markings, line marking systems and accessories for paint and marking applications. Suitable for both temporary and permanent markings. Includes products for construction, roadworks, industry, safety zones, forestry, utility works, etc.

Range: SOPPEC, ROCOL Easyline edge

Applications: Marking off work zones, indicating utilities/excavation points, marking warehouse floors, car parks, loading/unloading zones, safety zones around machines, storage areas, forestry markings, temporary construction-site markings, etc.

Corrosion protection and surface protection

The range includes cold galvanizing, zinc-rich sprays, anti-corrosion paints, protective coatings, VCI corrosion protection and technical maintenance sprays. For active protection of steel and iron against corrosion, moisture, weather influences and chemical exposure, including metal parts, electrical components, cabinets, packaged parts, spare parts, etc.

Range: Zinga, Jelt, Zerust, Metaflux etc.

Applications: Touch-up of galvanized structures, protection of steel in outdoor environments, anti-corrosion treatment of machines, protection of electrical cabinets, preservation of spare parts, maintenance of bolted connections, weld seams, plates and profiles, etc.

Detection and technical inspection

Includes, on the one hand, crack detection, where surface defects such as small cracks are made visible using a cleaner, penetrant and developer. On the other hand, it includes leak detection, where sprays are used to quickly make gas or compressed-air leaks visible on couplings, pipes, pressure systems, etc.

Range: Ardrex, Jelt, CRC etc.

Applications: Inspecting weld seams, detecting cracks in metal parts, for example in aviation, inspecting castings and machine parts, checking compressed-air lines, gas couplings, valves, etc.

ARDROX®

Jelt

CRC

Our brands

ARDROX®

ARDROX®

High-quality products for crack detection and surface treatment, including for the aviation industry.

JELT®

Jelt

Industrial systems, materials and high-quality technical products used in various sectors.

MOTIP®

MOTIP

Spray cans for automotive paint, maintenance and care.

BELTON®

belton

High-quality spray paints for professional use.

SOPPEC®

SOPPEC

Marking paint and marking spray for construction and industry.

RACING®

RACING

Sprays and paint products for decorative and protective purposes.

AUTO K®

AUTO K

Paint sprays for multiple purposes and various sectors.

METAFLUX®

Metaflux

Industrial sprays and maintenance products for industry, construction, maintenance and transport.

ROCOL®

ROCOL

Workplace safety products designed to make working environments safer and more efficient.

“

*40 years of expertise in
the industry makes
Ardeca Industries your
reliable partner*

”

With 40 years of expertise in the industry, Ardeca Industries is known as a reliable partner in providing specialized solutions for lubrication, silicone products, industrial adhesives, and degreasers/cleaners.

Our unique market position and independent collaboration with renowned manufacturers enable us to offer custom solutions that are efficient, sustainable, and environmentally friendly, precisely tailored to your specific needs and challenges.
